---

## Software Engineer

Aspiring software engineer with a strong foundation in key programming languages and frameworks, including Python, JavaScript (ES6+), TypeScript, React, React Native, and Next.js. Proficient in developing scalable solutions with Docker and building robust backend systems using Django and the Django REST Framework. Skilled in translating complex requirements into effective digital solutions, I am dedicated to solving real-world challenges through innovative technology.

## PROJECTS

---

### Seattle Device Repair

Web Development • 02/2022 – 08/2023

Revamped Seattle Device Repair's website using Next.js and Django, replacing its basic WordPress setup. This update improved site speed, user experience, and SEO, and added a seamless phone repair booking system, demonstrating advanced data management.

### Quick Clip (Smart Silence Trimmer)

Screen Recorder • 04/2023 – 06/2023

A user-friendly screen recording tool developed with PyQt5, featuring smart detection of silent periods. This application captures your screen and allows for fast-forwarding through non-speaking segments, offering a streamlined playback experience. Perfect for efficient review of recordings

## EDUCATION

---

### Associate in Computer Science

Edmonds Community College • Lynnwood, Washington • GPA: 3.2 • 03/2022 – 04/2024

## CERTIFICATIONS

---

### Meta Back-End Developer Specialization

Meta • 12/2022 – 04/2023

### JavaScript Algorithms and Data Structures

freeCodeCamp • 07/2023 – 08/2023

### Scientific Computing with Python

freeCodeCamp • 08/2022 – 09/2022

## SKILLS

---

**Programming Languages:** JavaScript (ES6+), Python, TypeScript

**Frameworks and Libraries:** Django, Django REST, Next.js, React, React Native

**Containerization and Virtualization:** Docker
